The GM Series

SALT CHLORINATOR & ORP/pH CONTROLLER COMBO

THE ULTIMATE IN SALT WATER MANAGEMENT

- Constantly monitoring and maintaining your pool chemistry
- Prevents under and over chlorination
- Prevents damage to pool interiors and pool blankets
- Compatible with mineral salt pools and spas
- Fully automatic sanitiser and pH controller

Australian Made

The GM Series

The GM Series is a fully controlled salt water management system. A multi-electrode probe analyses water chemistry and determines how much chlorine needs to be produced by the electrolytic cell. The probe also assesses the pH of the water and adjusts as necessary.

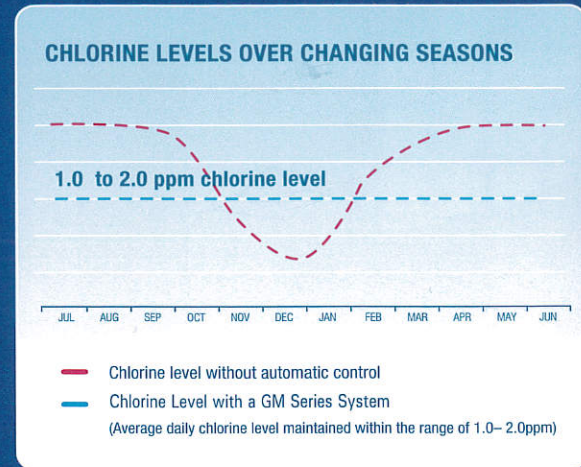

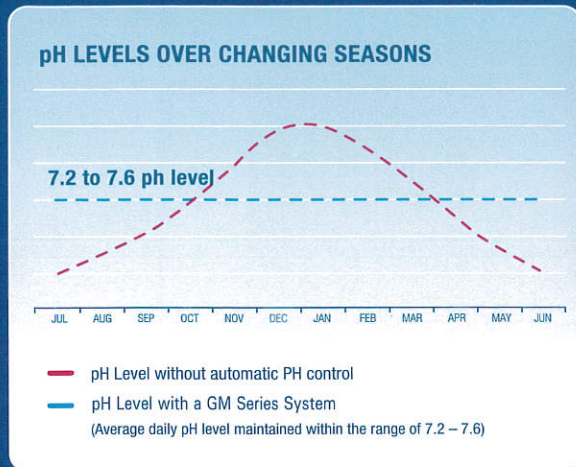

- **Saves energy and money**
- **Constantly maintains your pool chemistry within safe levels**
- **Prevents over-chlorination**
- **Prevents bleached pool blankets and interiors**
- **Fully automatic sanitiser and pH control**

The GM Series - with Mineral Salt

The GM Series has been specially designed to automatically manage mineral pools that are increasingly popular with health conscious pool owners. The water chemistry of mineral pools is surprisingly complex, but a GM Series system takes the guesswork out of managing your pool.

- **Specially designed for mineral pools**
- **Enjoy the health benefits of a mineral pool without the effort**
- **Extends life of electrolytic cell**

The GM Series Advanced +

The GM Series Advanced + adds a further dimension to pool water management. It comes with a liquid chlorine booster function that allows you to reduce pump running times, saving energy and money. Off-peak power can also be used to help achieve further savings while maintaining a safe and healthy pool.

- **Liquid chlorine booster function**
- **Cuts pump running times in half**
- **Additional energy and cost savings**
- **Effortlessly manages peak bather loads and climate changes**
