Upgrade your lights to LED

Hi Guys,
Just had your LED
lights installed in my
pool and I am totally
blown away with the
brightness.
Now my backyard
looks like a resort!

POOL OWNER - SYDNEY

Upgrade your pool lighting system to the Australian made QC LED Series and see the wow factor for yourself...

- without draining your pool,
without buying a new transformer!

Relax... your pool has never looked more inviting!

QC Surface Mounted lights are ideal for new and existing concrete pools.

Amazing LED Colours

QC LED lights are available in either fixed colour or multi-colour options. The fixed colours are white, blue or green – the multi-colour option features unique Colour Selection Palette which provides an almost limitless variety of colour possibilities and a vast array of pre-programmed scroll and flash modes.

Energy efficient and super bright

QC Series LEDs are energy efficient, drawing only 15% of the power requirement of older style halogen lights. QC LED lights incorporate the latest generation LED technology and thermal management system to ensure maximum light output and reliability. QC LED lights are significantly brighter than older 100w halogen systems.

Variable Voltage Technology

Each QC Series Light is able to be operated from a supply voltage ranging from 12 Volt AC through to 32 Volt AC, thereby utilising the existing transformer.

Quick Connect Feature

When installing into an existing pool, the Quick Connect Plug Kit is the simplest and most convenient way to safely and reliably join the pool light to the existing cable. Cable seals of varying sizes are provided to ensure that the QC Series Light quickly connects up to cables of varying thicknesses.

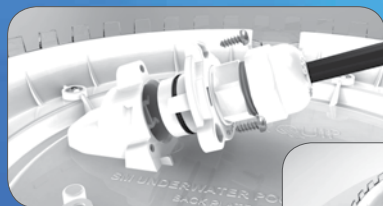

For installation in new pools, QC Series LED Lights are available in 20m or 30m cable lengths and connect to a 12v transformer.

Universal Mounting Bracket

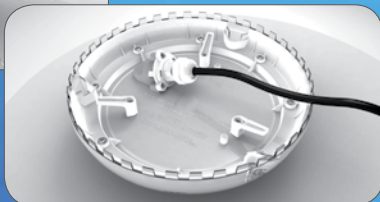

The innovative bracket is used for both retro-fit applications and for new pools. To aid retro-fitting into existing concrete pools, the universal mounting bracket has a variety of screw provisions to ensure compatibility with all brands of pool lights.

Simple Installation

Step 1. Fit the plug kit to the existing cable.

Step 2. Push into rear of light and tighten screws.

Specifications:

Power Requirement: 12v ~ 32v AC 50/60Hz
Power Consumption: Max 22VA at all colours and voltages 12v ~ 32v
Light Colour: White >5,000K, Blue 475nm, Green 525nm
