RELTECH SUCTION COVER OUTLETS

WARNING - IMPORTANT INFORMATION

1. Reltech recommends that all installers have an understanding of the current Australian Standard AS 1926.3 2010 prior to installation.
2. All Reltech Suction Cover Outlets have been tested in accordance to the AS 1926.3 2010 and meets the acceptance criteria.
3. Test data has been permanently marked on each suction cover backing.
4. All suction cover outlets must be fixed to the pool wall to prevent removal without the use of tools. (as per AS 1926.3 2010)
5. **All “Push-Fit” suction cover outlets come unassembled with 5mm wall fixing screws and plugs.**
6. It is the responsibility of the installer to ensure that the maximum allowable flow rates that are displayed below and on the suction cover outlets backings **are not exceeded.**
7. All Reltech Suction Cover Outlets are proudly **Made in Australia** to ensure the consistent level of quality is always maintained.
